### **DETAILED ACTION**

Previous rejections and issues not discussed below have been withdrawn.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 43-45, 47, 16-23, 25-28, 43-45 and 47 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Present claim 43 line 4 recites "additional metal". However, original claim 15 recites, "at least one additional metal". Please make correction.

#### ***Objection according to 37 CFR 1.75(d)(1) and MPEP § 608.01(o)***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The body of the original specification (not including the original claims) does not recite the following:

Claim 16: the ratio M:Fe for the compound is at 1.1:1; The original specification recites Ca:Fe in a ratio of 1.1:1,

Claim 17: the ratio M:Fe for the compound is at 1.3:1; The original specification recites Ca:Fe in a ratio of 1.3:1,

Claim 18: the ratio M:Fe for the compound is at 1.7:1; The original specification recites Mg:Fe in a ratio of 1.7:1,

Claim 19: the ratio M:Fe for the compound is at 5:1; The original specification recites Mg:Fe and Ca:Fe in a ratio of 5:1,

Claim 20: the ratio M:Fe for the compound is at 2.6:1; The original specification recites Ca:Fe in a ratio of 2.6:1, and

Claim 21: the ratio M:Fe for the compound is at 2.4:1; The original specification recites Mg:Fe in a ratio of 2.4:1.

***Other Matters/Suggestion***
